EXPERIENCE

Associate System Engineer - Full stack development

Tata Consultancy Services

07/2021 – present (1+ years)

Client: PsPrint - a online printing services

- **Project:** SAP ERP S/4 HANA Integration
- **Project Description:** **Data migration** from SAP ERP Central Component (ECC) to SAP S/4HANA provides enhanced scalability to support data storage and analysis requirements.

My roles and responsibilities:

- Developing high-performing **front and back-end** experiences.
- Worked in **production** maintenance and deployments.
- Worked closely with the QA team to resolve bugs, followed by UAT deployments.
- Exposed to the clean code approaches and **optimizing** the best practices in securing the application effectively.

Stacks - Angular JS, Node JS, AWS, MySQL, PHP, and Git.

Volunteer Activities:

- Actively contributed as a SPOC(Single point of contact) to **business process improvement** which confluence of 3 teams.
- Revamped a web and mobile application 'Medibuddy' which is the third-party application of TCS in which we can order medicines and consult a doctor online. **Created various features** to increase user engagement and retention for new and existing user. Designed high-fidelity wireframes and prototypes along with unique design styles to meet the application's overall **aesthetic feel** and **visual balance**.

UI Designer - Intern

Beez Innovation Labs Pvt Ltd

05/2021 – 06/2021

Automotive articles for Saint-Gobain - web application, Starting with the inspiration board I picked the most relevant themes and collated them into wireframes followed by UI layouts to improve the digital presence of the application. A polished deliverable to the one we envisioned.

UX & Motion Designer

Freelance - NDA

09/2020 – 12/2020

Ed.tech - web and mobile application, While the central focus was on conducting research and designing user-centred digital applications from initial concept to final. In parallel, created an animated video that enables businesses to facilitate a positive user experience.
