Experience

07/2021 – present

Associate System Engineer - Full stack development
Tata Consultancy Services

Client: PsPrint - a online printing services
- *Project:* SAP ERP S/4 HANA Integraion
- *Project Description:* **Data migration** from SAP ERP Central Component (ECC) to SAP S/4HANA provides enhanced scalability to support data storage and analysis requirements.

My roles and responsibilities:
- Developing high-performing **front and back-end** experiences.
- Worked in **production** maintenance and deployments.
- Worked closely with the QA team to resolve bugs, followed by UAT deployments.
- Exposed to the clean code approaches and **optimizing** the best practices in securing the application effectively.

Skills - Angular JS, Node JS, AWS, MySQL, PHP, and Git.

Volunteer Activities:
- Took initiatives as a SPOC(Single point of contact) for **business process improvement** which confluence of 3 teams.
- Revamped a web and mobile application 'Medibuddy' which is the third-party application of TCS in which we can order medicines and consult a doctor online. **Introduced new features** by designing some add-on features for the **user engagement** to draft it as a complete healthcare platform. Parallelly, I established some design styles to meet the application's overall **aesthetic feel** and **visual balance**.

Achievements:
- I cracked the **DCA assessment** and stepped into **digital cadre**. Elevates Wings 1 DCA program is a **Direct Capability Assessment** for TCS associates who have 0–3 years of work experience and have an **intermediate understanding** of at least one of the **digital technologies** — Cloud, Data Science, Machine Learning, Artificial Intelligence, Blockchain, and so forth.

05/2021 – 06/2021
